Convolutional Neural Networks

Padding

Padding

- shrinky output
- throw away info from edge

<- Padding prevents:

*

=

3×3
 $f \times f$

$p=2$

6×6

6×6 \rightarrow 8×8
 $n \times n$

$n - f + 1 \times n - f + 1$

$6 - 3 + 1 = 4$

$p = \text{padding} = \underline{1}$

$n + 2p - f + 1 \times n + 2p - f + 1$

$6 + 2 - 3 + 1 \times \underline{\quad} = 6 \times 6$

\rightarrow ~~4×4~~

Valid and Same convolutions

no padding

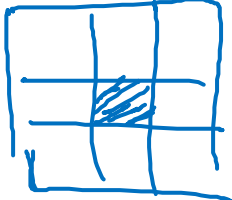

“Valid”:

$$\begin{array}{ccc} n \times n & * & f \times f \\ 6 \times 6 & * & 3 \times 3 \end{array} \rightarrow \begin{array}{c} \underline{n - f + 1} \times n - f + 1 \\ 4 \times 4 \end{array}$$

“Same”: Pad so that output size is the same as the input size.

$$\begin{array}{l} n + 2p - f + 1 \times n + 2p - f + 1 \\ \cancel{n + 2p - f + 1} = \cancel{n} \Rightarrow \boxed{p = \frac{f-1}{2}} \\ 3 \times 3 \quad p = \frac{3-1}{2} = 1 \quad \left| \begin{array}{c} 5 \times 5 \\ f=5 \end{array} \right. \end{array}$$

f is usually odd

1x1
3x3
5x5
7x7
